ICID-CID

International Workshop Innovation of Developing the Strategy for Impact Assessment of and Adaptation to the Climate Change as the “New Normal”

01 September 2019: 14:00-18:15 hours

Bali, Indonesia

SCOPE: The international community has achieved significant developments of the climate change measures in recent years. One of them is the Paris Agreement of 2015, which was adopted aiming at keeping the average global temperature rise below 2 °C, above the pre-industrial levels, and limiting it to 1.5 °C. It is also aiming at enhancing the ability of countries to deal with the climate change impacts. In the same year 2015, the Sustainable Development Goals (SDGs) were adopted, which stipulates climate change measures to be one of its 17 goals to be achieved by 2030. In these international contexts, the theme of the WIF3 identifies that the climate change adversely affects the water-energy-food nexus, and the quantitative and qualitative uncertainties of changing climate are becoming a cause for serious concern in agricultural water management.

To develop efficient and effective measures to adapt to the changing climate and mitigate the climate change, the more reliable information of the future impacts with less uncertainties are to be developed through innovative impact assessment and shared with all the stakeholders. In the workshop, strategies for developing the innovative impact assessment of the climate change on agriculture and the smart water management for adapting to the climate change will be discussed. The workshop very much relates with the Topic 1 “Climate Change and water conservation policy” of the Sub-Theme 1 and the Topic 3 “Impact of climate change on agriculture and irrigation” of the Sub-Theme 2 of WIF3.

OBJECTIVE: The main objective of the workshop is to discuss the strategies for developing the innovative impact assessment of the climate change on agriculture and the smart water management for adapting to the climate change.

THEME /SUB-THEMES: The abstracts/ papers are invited from the professionals, researchers, experts, and scientists from private and government sectors on the following theme and sub-themes as per the deadlines given below:

Theme: Innovation of Developing the Strategy for Impact Assessment of and Adaptation to the Climate Change as the “New Normal”

Sub-themes: 1. Integrated Assessment of Climate Change Impacts; 2. Adaptation to Climate Change; and 3. Smart Water Management for Mitigating Climate Change

Workshop Program: Under Preparation

This Workshop is being organized by ICID’s Working Group on Climate Change and Agricultural Water Management (WG-CLIMATE) during the Third World Irrigation Forum (WIF3) and 70th International Executive Council (IEC) meeting from 1-7 September 2019 at Bali, Indonesia.

CONTACT COORDINATES:

Workshop Chairman: Prof. Tsugihiko Watanabe, Chair, WG-CLIMATE; E-mail: nabe@kais.kyoto-u.ac.jp

Workshop Coordinator: Er. Harish Kumar Varma, Executive Director, ICID, E-mail: icid@icid.org
